

FEST

experience for future

Our Mission

Best Practices and Flexibility – In Complete Alliance

Now more than ever, you need a reliable partner at your side – to keep pace with industrial requirements and developments in the global environment, as well as to operate processes and production lines optimally.

And that, is exactly the partner we want to be for you!

Our History

Entrepreneurship is in our genes

We have remained true to more than just our founding location since our establishment in 1948. Nonetheless, we reinvent ourselves daily!

- 1948** Establishment
FEST GmbH in Goslar
- 2001** Part of the SK group
- 2013** IPS-FEST GmbH
- 2019** FEST-CONSULTA LLP
- 2020** green-h2-systems
- 2024** New headquarters
FEST GmbH

Our Vision

We pursue long-term goals with a high degree of agility.

Datasets are nowadays one of the most valuable resources for the security and success of companies.

We specialize in automation, energy and IT solutions, allowing us to capture, analyze and optimize your data in real-time with state-of-the-art solutions, with the aim of using this data to make your production processes more efficient and smoother.

Additionally, periodic data gathering can aid to optimize operating costs and

ensure systems to perform consistently at peak levels.

The new headquarter

Shaping the future today

As we embark into a new era with high aspirations and growth potential, we have created a new and regionally connected working environment. State-of-the-art office spaces offer a

flexible and interdisciplinary working environment for our employees. This is the key to innovation and accountability.

Production

Our hydrogen plants and our electrical switchgear are produced in newly created production halls, assisted by digital processes and logistics. We live „Made in Germany“.

2

Our Brand – Decades of Experience and Continuous Development – Powered by Our Workforce

3 KNOW-HOW

At FEST TECHNOLOGY, we are uniting our now 50 years of experience in three areas – Automation, Energy and IT Solutions – so the world of tomorrow can be as lovable and livable as possible.

EXPERIENCE

It is our responsibility to leverage the experience of over half a century filled with economic growth, advancement, and overcome challenges to keep you moving forward.

FUTURE

The future of our planet affects us all! Everyone – of any origin or generation. Meeting this commitment conscientiously inspires us every day.

Process Technology

FEST sets the pace

We take your plant forward and ensure planning security through scalable, digitally networked and perfectly coordinated software and hardware solutions.

Energy

FEST provides

We digitize, optimize and scale production processes by delivering power supplies and switchgear in both AC and DC technology.

IT-Solutions

FEST interconnects

Today, data is deemed one of the most fundamental resources to your company's success. Managing and securing this at the production level to its full extent is increasingly challenging. We are committed to solving precisely this challenge.

4

FEST

Hydrogen Technology: Our path to the future!
We develop and manufacture systems for the production and use of hydrogen, serving both mobility applications and industrial processes. Climate technology made in Germany.

Vision

At FEST, we are driven by the global transition towards a sustainable future, powered by green energy and the hydrogen technologies required to make it possible.

Mission

Both for the sake of our magnificent planet and for Germany's economic strength, we feel called upon to make a significant contribution to the energy transition.

Motivation

Turning our vision and mission into reality inspires and motivates our daily efforts to achieve new heights and implement innovative solutions!

Solutions

H2 from A-Z

Our H2 solutions enable the supply of hydrogen based on renewable energy, covering the entire chain from production and transport to storage and application.

This business area also includes the contracting and engineering of commercial hydrogen refueling stations for road mobility as well as rail, aviation and maritime applications.

In close partnership, we integrate products from our sister company.

Services

Availability

Through our lifecycle services, we stay closely connected with our customers and their systems. Using cloud-based services, we analyze operating conditions and initiate the required support. Spare parts are managed digitally, while our specialists provide remote or on-site assistance to maximize system availability. We also establish networks of trained service partners, enabling us to respond quickly and internationally.

6

Our H2 Product Portfolio

We develop products, provide engineering services and turnkey solutions – regionally and internationally.

Mobility Solutions

The sustainable fuel produced by H₂ electrolysis is currently being harnessed to create an environmentally friendly alternative to heavy oil, gasoline and diesel.

Hydrogen Products

Our greenelectrolyzers represent THE innovation from the Northern Harz region, converting green electricity into hydrogen suitable for both the mobility revolution and large-scale industry.

Industrial Solutions

Large companies benefit, too, from the highly scalable electrolysis technology of our plants for the substitution of fossil fuels in industrial processes.

Growth

In cooperation with our clients

Global Approach

Together with our customers, we aim to drive innovation and venture into new business areas so that we can contribute to climate neutrality with sustainable and resource-saving solutions.

Industry/Application segments

We are proud to be part of the hydrogen economy and actively participate in shaping it. FEST develops in dialogue with its customers the optimal solution for their specific application, considering feasibility and efficiency.

People

FEST – Social circle of today, and tomorrow

9

Our people are our most valuable asset. We are immensely proud of our motivated and talented colleagues, who are both the heart and soul of our company.

At FEST, we all have a clear conviction about the necessity of the energy transition and the contribution that hydrogen and our solutions can make to it. We give our best each and every day, calling out the status quo to inspire our clients by introducing new innovations.

As a company, we put our employees at the center of everything we do and give them the best possible social environment so they can grow with us – and they pay us back with high levels of commitment, positive vibes and enjoyment of their work! We are more than grateful for that!
